

Évolution des paramètres BKT au cours des itérations EM

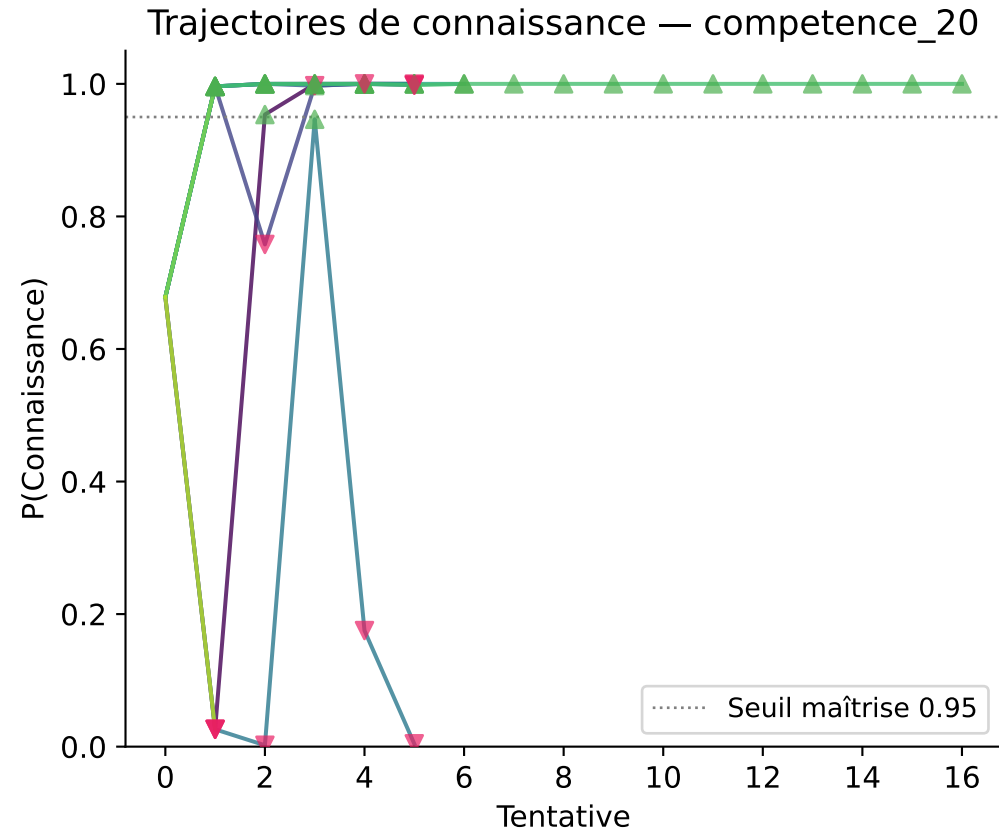

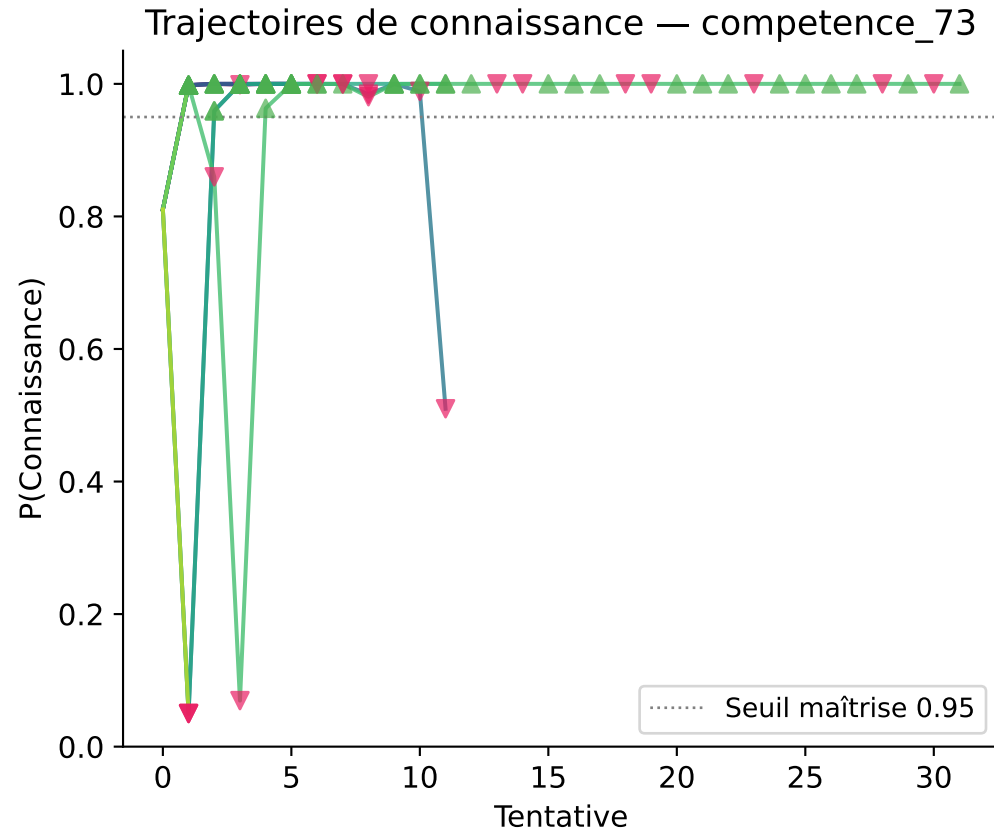

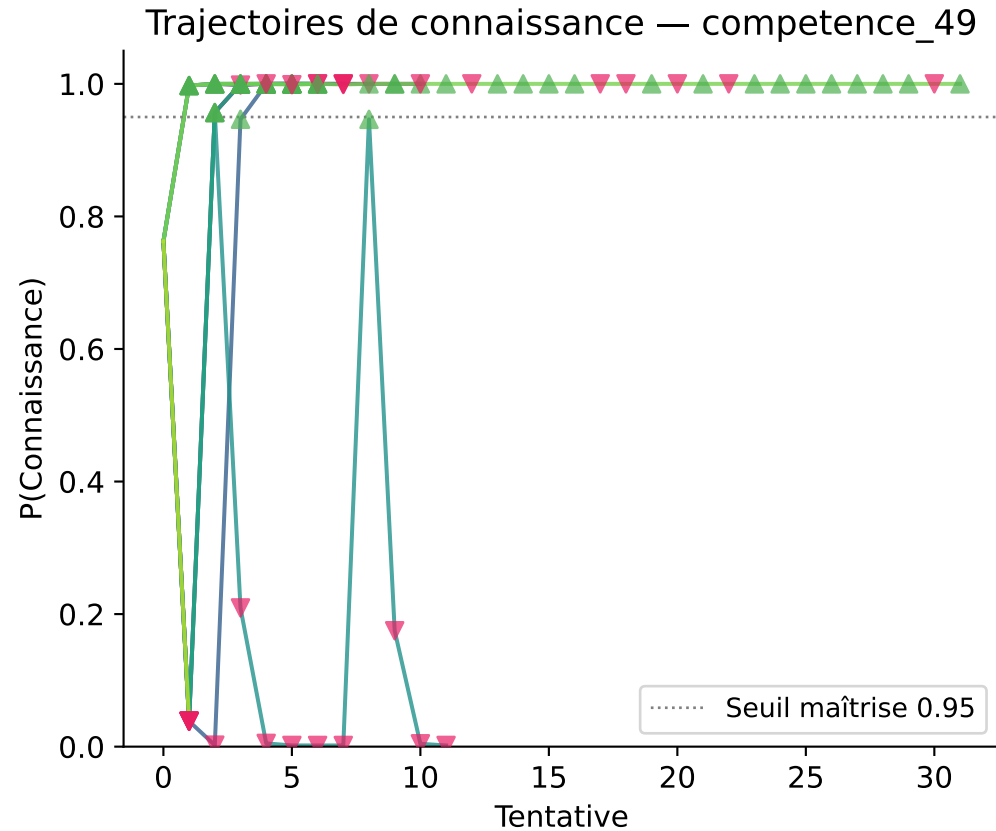

Convergence EM — évolution de chaque paramètre BKT
(102 compétences · lignes fines = individuel · ligne épaisse = moyenne)

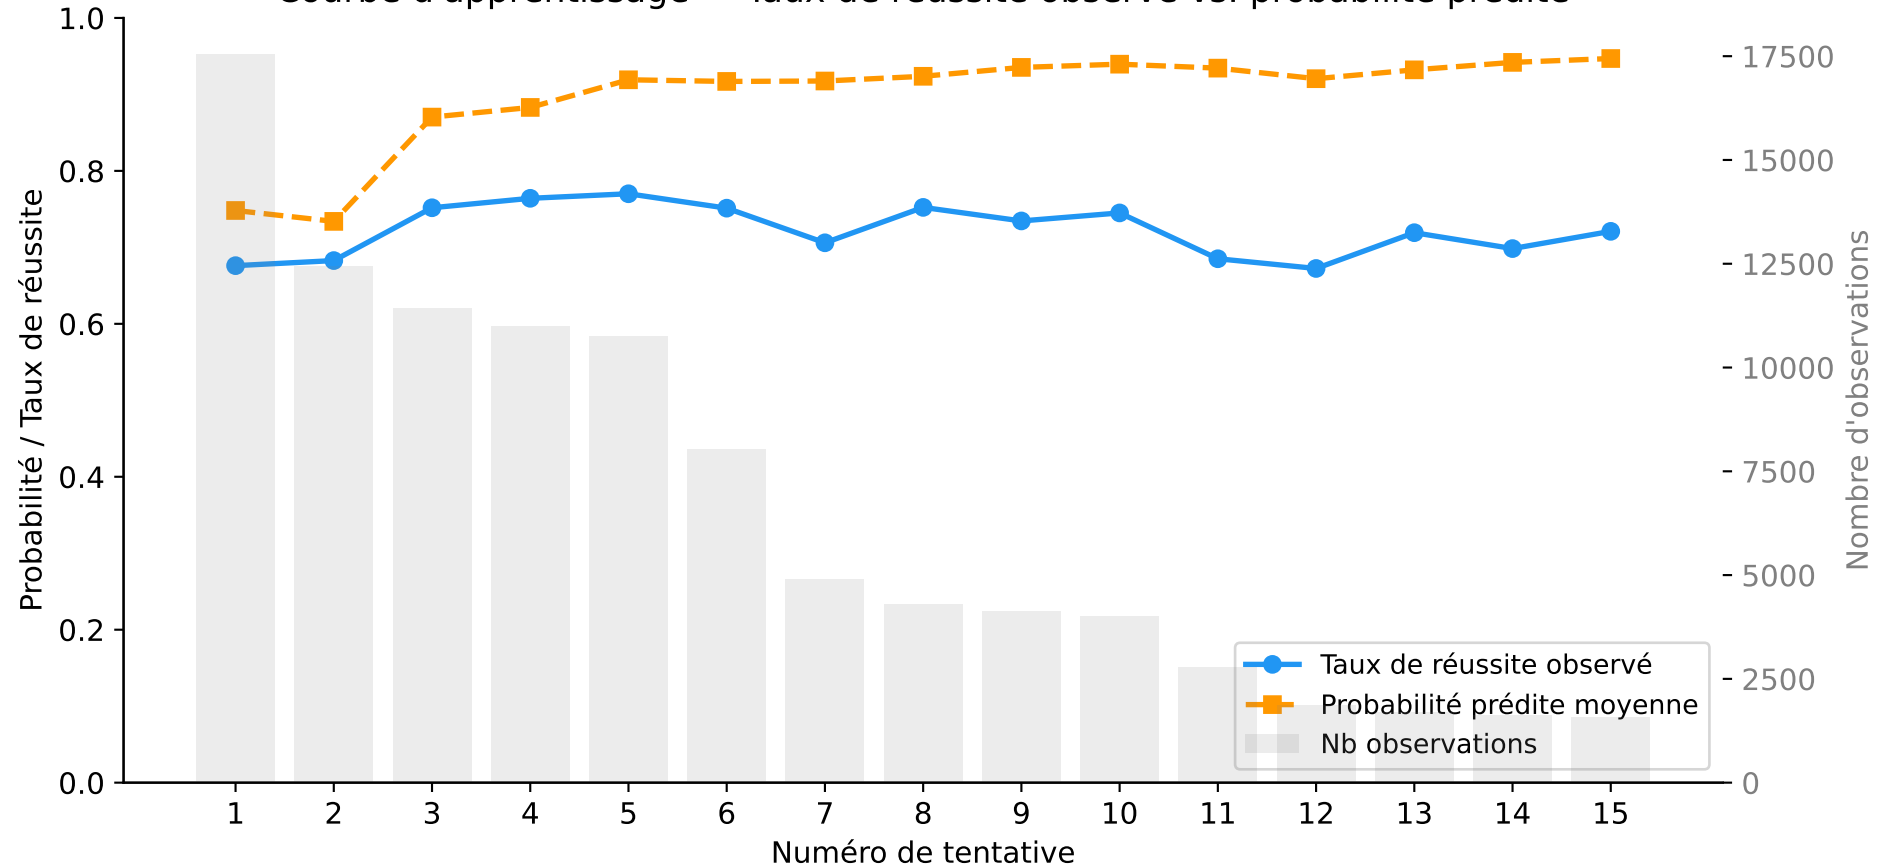

Distribution des paramètres BKT finaux (toutes compétences)

Évolution de P(Connaissance) par étudiant (▲ correct, ▼ incorrect)

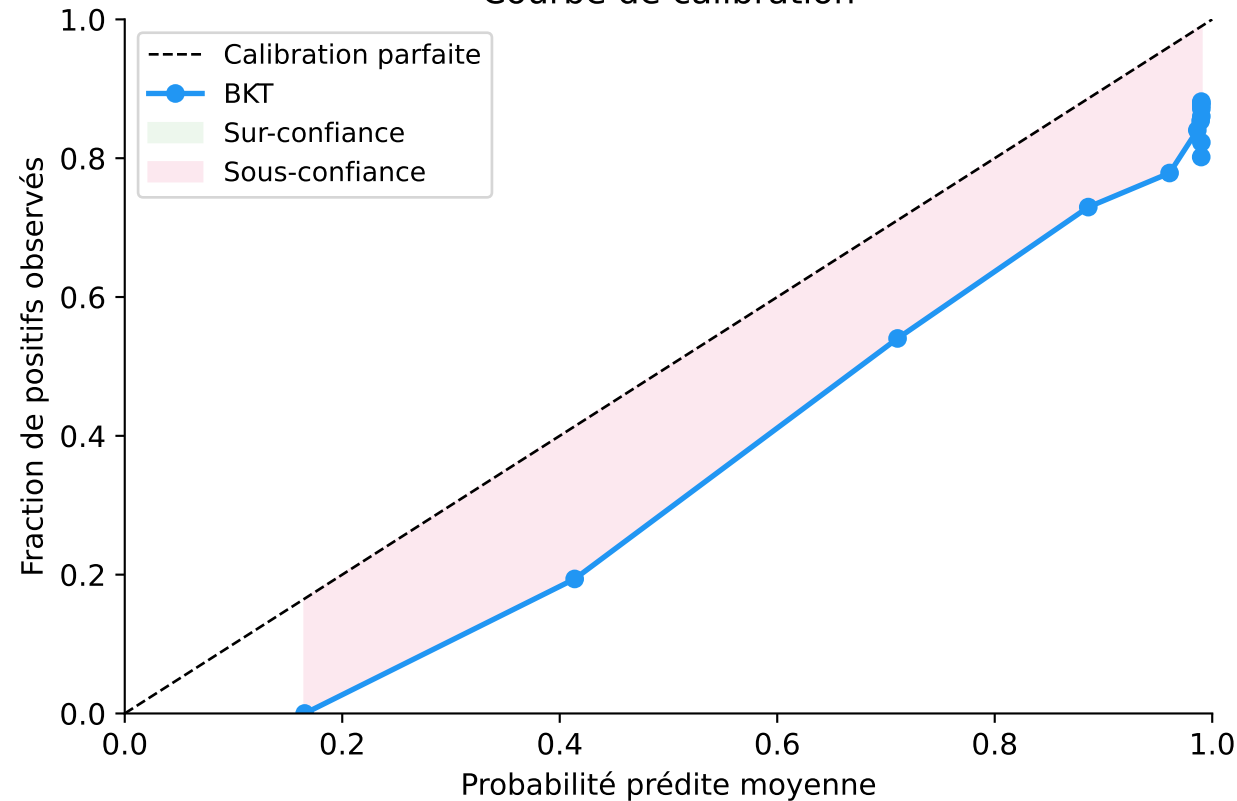

Courbe d'apprentissage — Taux de réussite observé vs. probabilité prédite

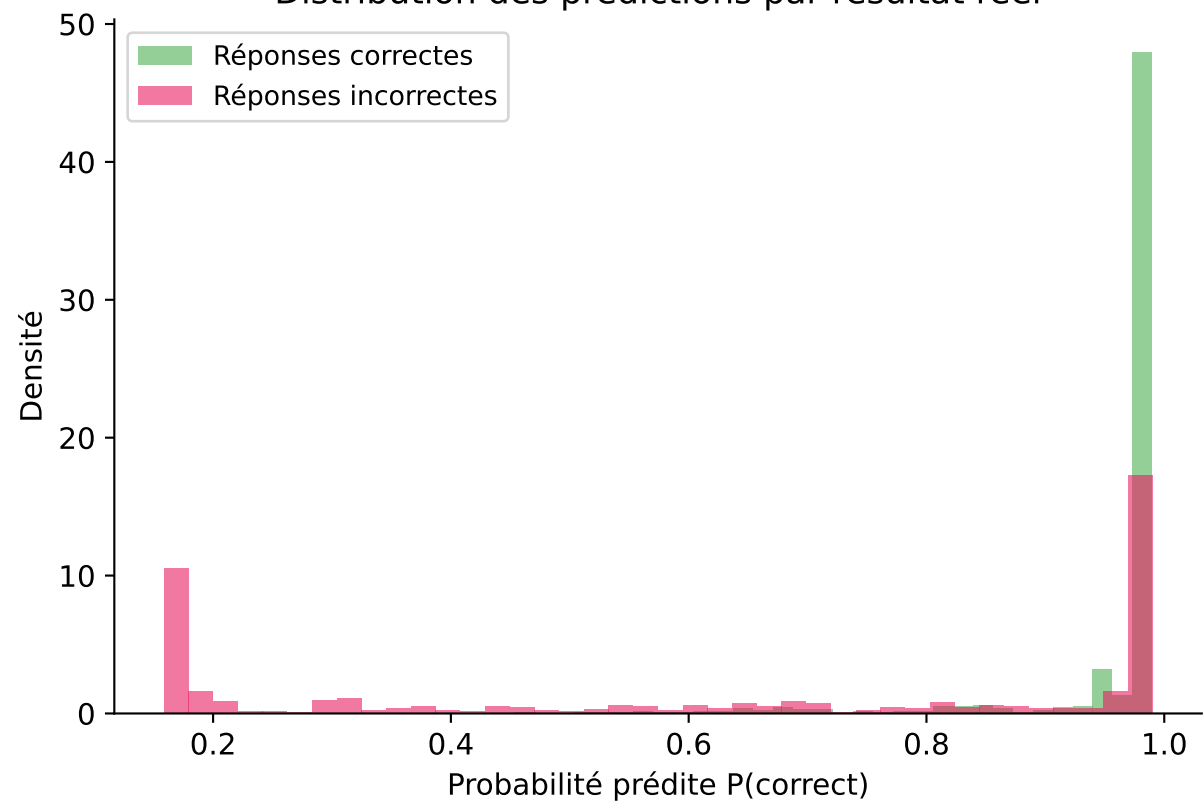

Analyse de la calibration du modèle BKT

Courbe de calibration

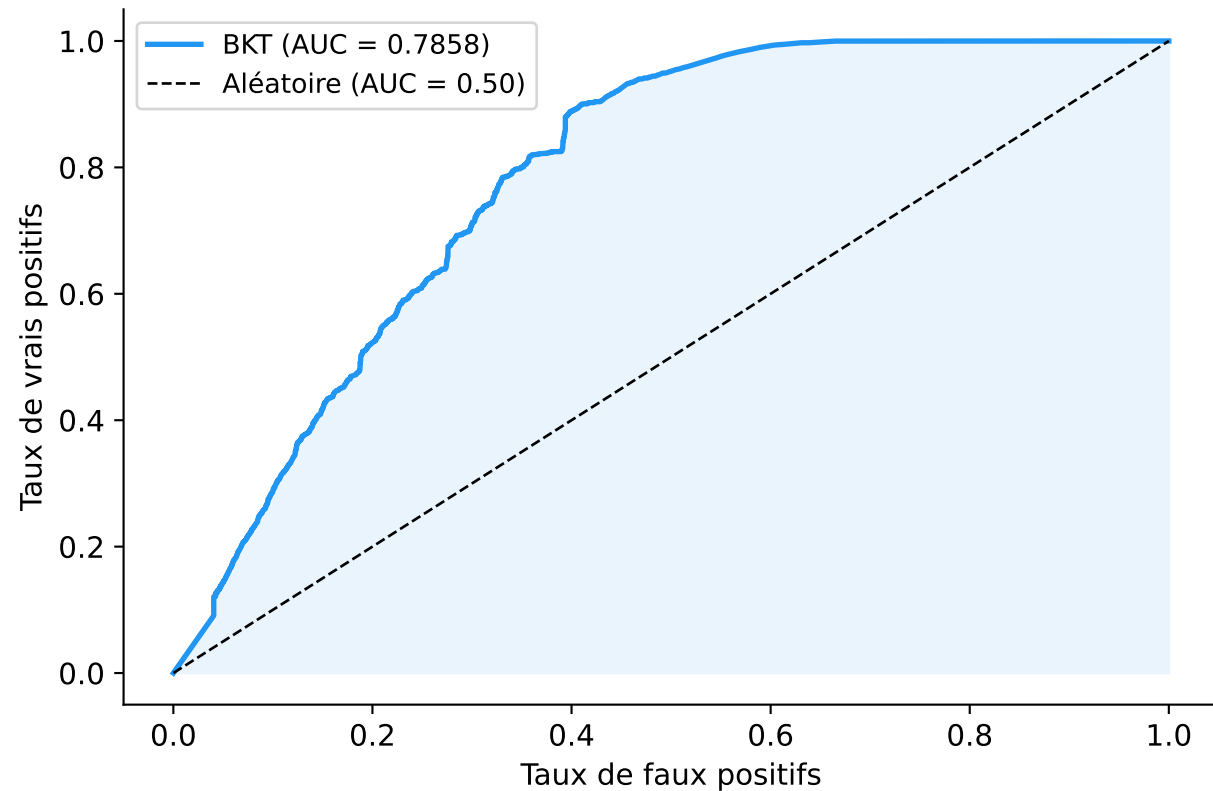

Distribution des prédictions par résultat réel

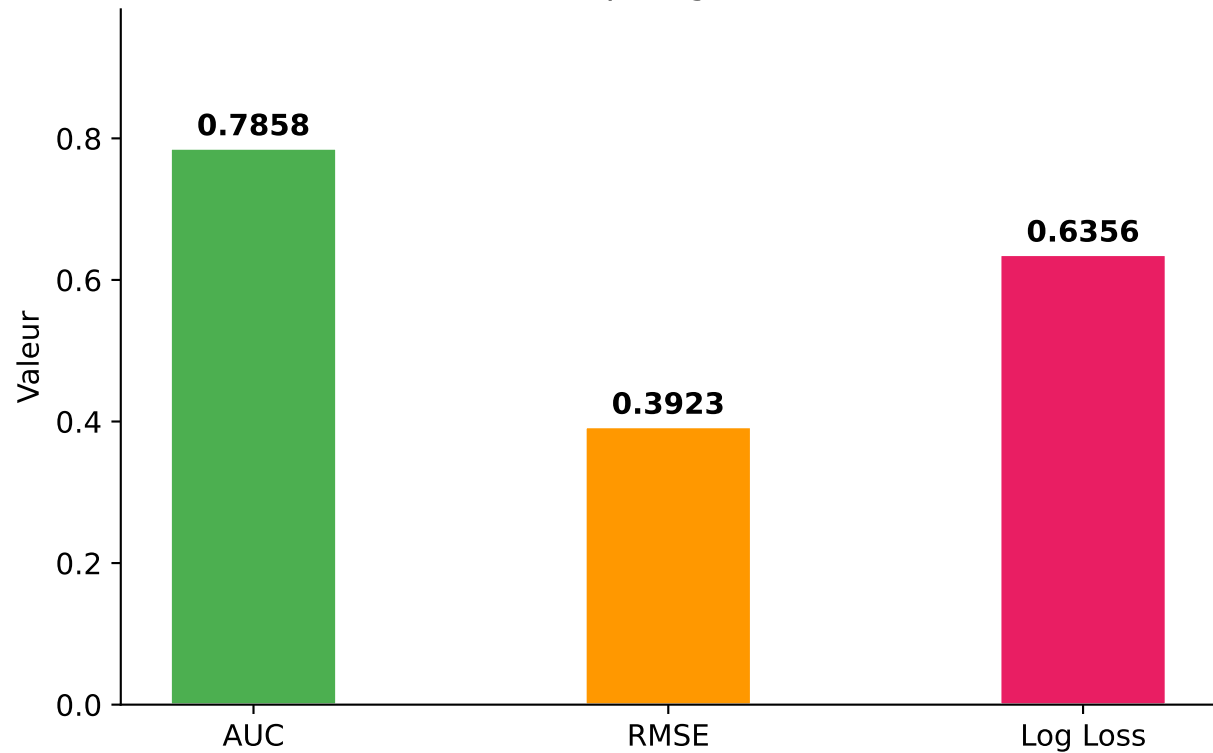

Performance globale du modèle BKT

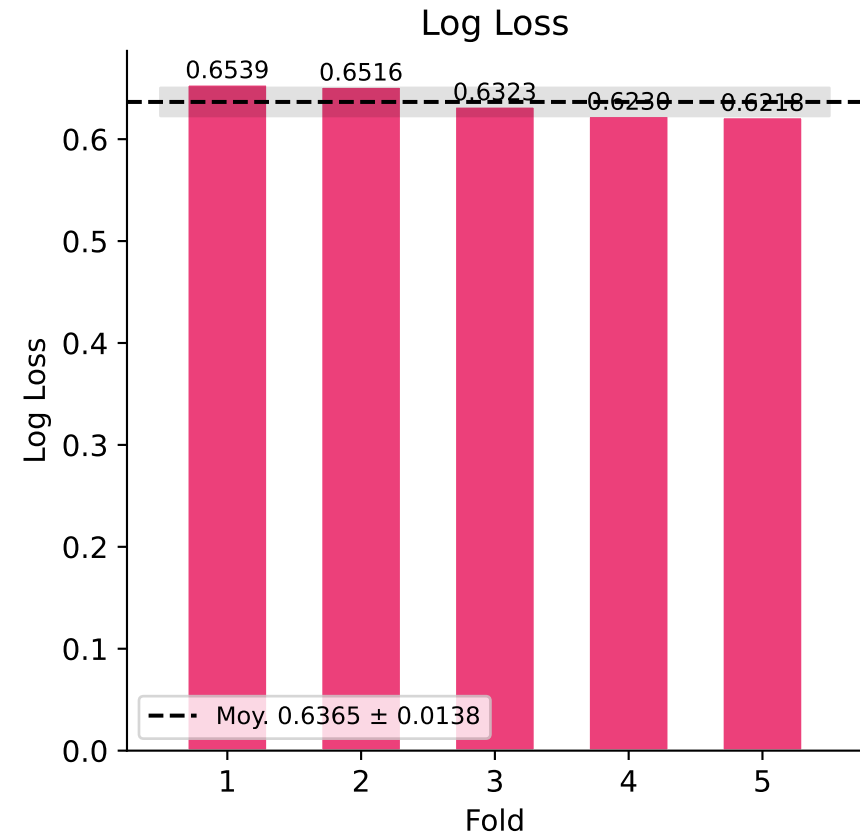

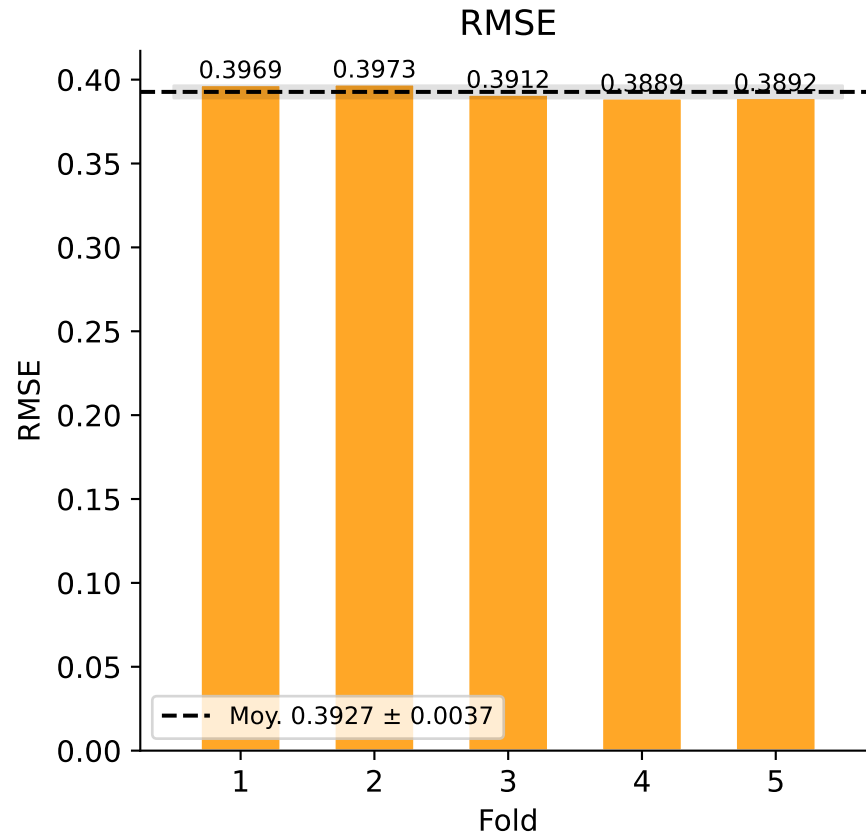

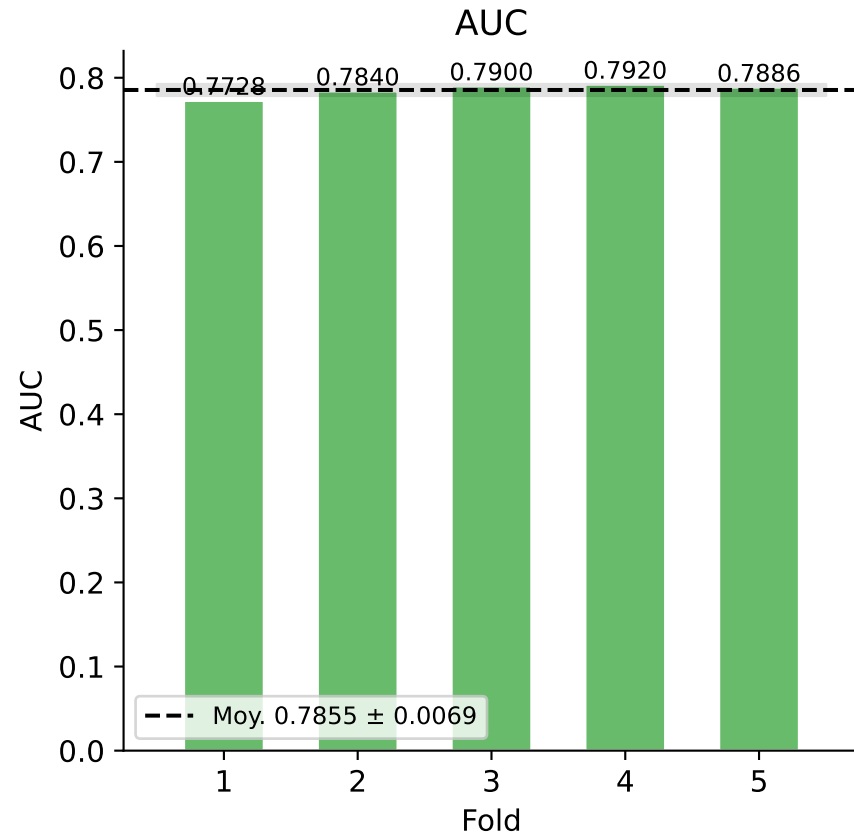

Courbe ROC

Métriques globales

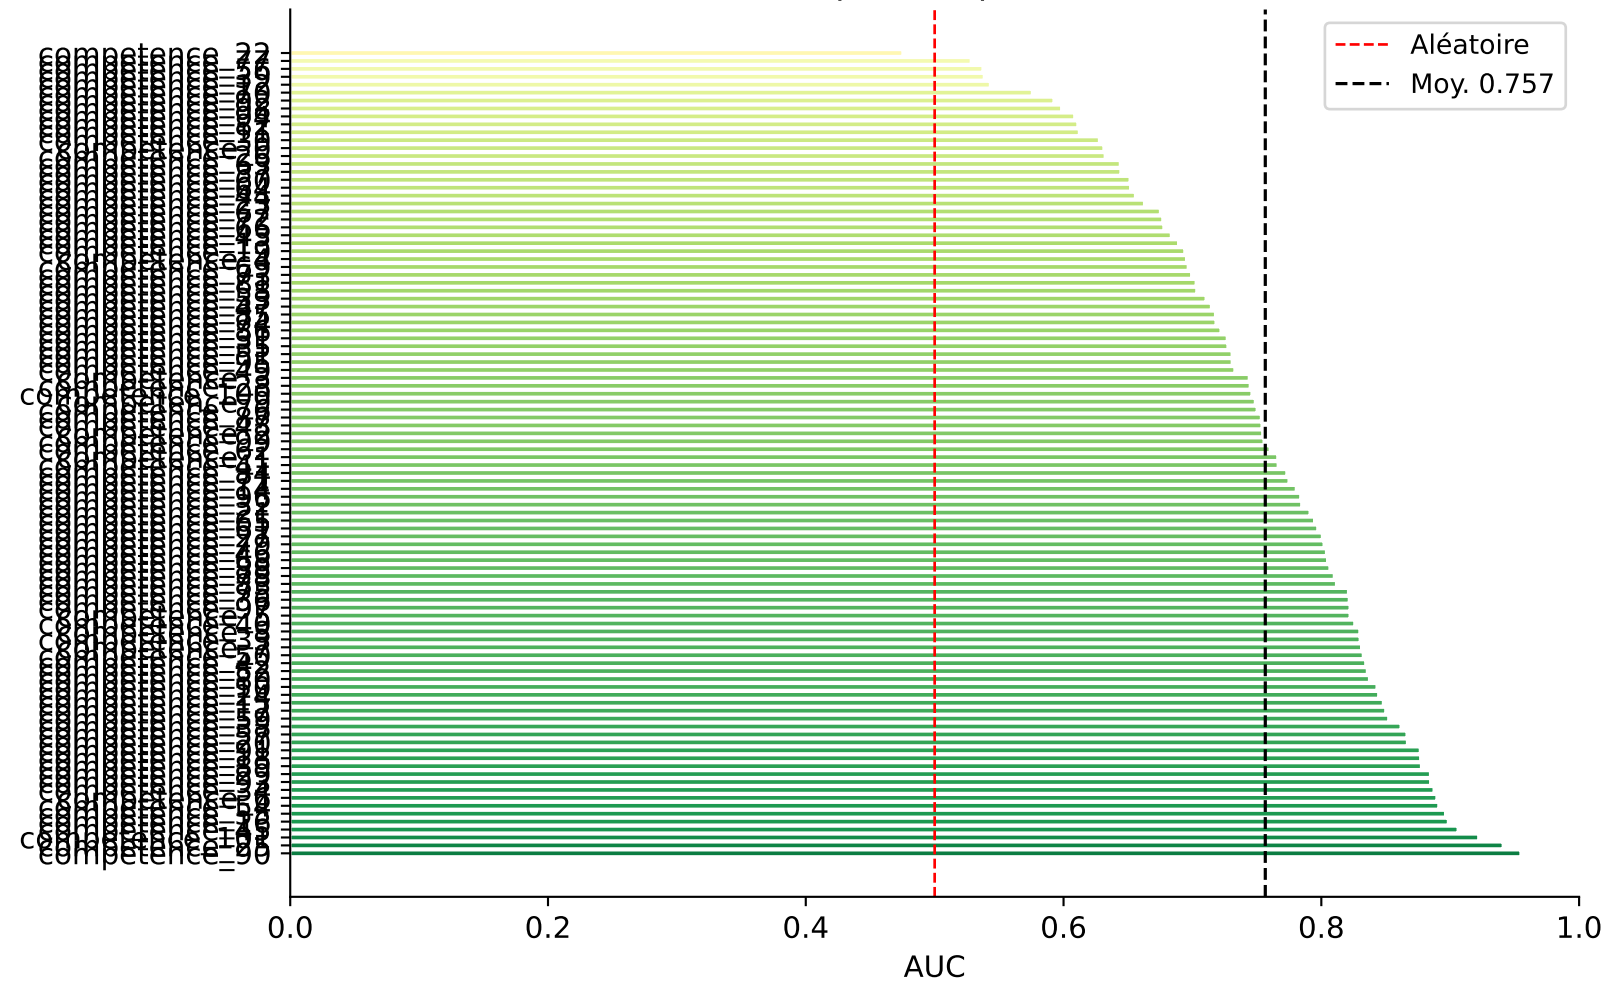

Résultats de la Cross-Validation 5-Folds

Performance par compétence

AUC par compétence

AUC vs. Taux d'apprentissage (taille = nb. observations, couleur = p_0)
